JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FLORIDA LOSES DR. DAVIS

Dr. H. S. Davis, Professor of Zoology, including entomology, at the University and a charter member of our society, has resigned to accept a position with the Bureau of Fisheries. Dr. Davis is an authority on the protozoan diseases of fishes and has been spending his summer vacations with the Bureau for many years.

Dr. Davis is a fine teacher and the University and our Society will miss him greatly. He will reside in Washington. His place will be taken by Dr. J. S. Rogers, a graduate of the University of Michigan, now teaching in Grinnell, Ia.

Science Hall, Nov. 28, 1921.

The regular monthly meeting of the Florida Entomological Society was called to order at 4:30 P. M., President Watson in the chair. Members present: Lord, Cody, Newell, O'Byrne, Montgomery, Burger, Merrill, Goodwin, Lazonby, Stirling, Beyer, Davis and Chaffin.

Application of Miss Miller of Eustis for membership was received and she was duly elected.

It was moved and passed that a Committee of three be appointed to confer with a similar committee of the Horticultural Seminar, as to the advisability of a fusion of the two societies or an arrangement for joint meetings. Dr. J. H. Montgomery, Dr. O. F. Burger and Dr. E. W. Berger were appointed on the committee. The committee was instructed to report at next regular meeting.

It was moved and passed that the society give Dr. H. S. Reed of California a smoker when he visits Gainesville next month, and that this smoker take the place of the regular December meeting of the society.

The paper of the evening was: "Bean Jassids and Their Control" by A. H. Beyer. Mr. Beyer illustrated his talk with stereopticon views and it was both valuable and interesting, showing the results of a great deal of careful work, and illustrating the value of spraying for this insect. He also showed the spraying attachment that he invented which will thoroughly wet both sides of the leaves.

There being no further business the society adjourned.

J. CHAFFIN, *Secretary*.
